

Small roasting machine "Meika"

TERADA

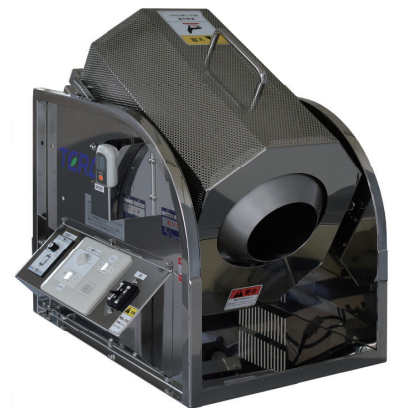

Excellent roasting can be processed easily with fragrance and gloss.

Inside drum

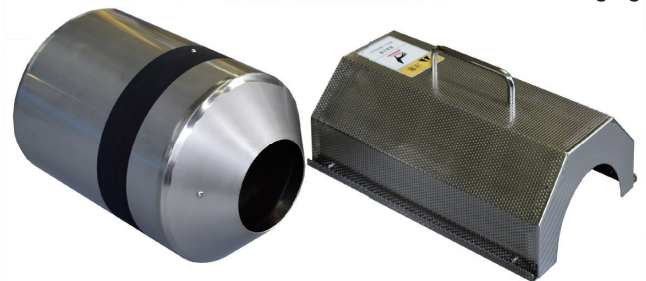

When feeding

When discharging

Features

- Power of heater and number of rotations can be adjusted freely according to the roasting degree.
- Feeding & discharging can be done easily by changing the angle of drum.
- Drum and body are hygienic stainless steel. Both the drum and drum cover can be discharged & cleaned.
- Since domestic power source (100V) is used, It can be used anywhere easily.
- Drum temperature while processing can be measured according to the attached radiation thermometer. The product temperature can also be measured since the thermometer is detachable.

Drum & drum cover can be attached/detached easily.

- ★ Most suitable for Aracha (crude tea) sample roasting & for tests.
- ★ It can be used for demonstrations at events & shops.
- ★ It can be used for blended selling at shops.
- ★ Can also be used for re-firing the tea.
