

# ネット乾燥機

NET CONVEYOR TYPE DRYER

# Most suitable for drying leaf vegetable as barley leaf, mulberry leaf etc.

### **Features**

- It is a continuous convective heat transfer type dryer of which the material moves on net conveyor and dries with hot air.
- Excellent in drying efficiency since the material & hot air contacting area (heat transfer area) is large.
- Balanced high quality drying is possible since the hot air temperature & air rate can be set according to the drying state (moisture content) of material with LPG Direct fire type hot air generator.
- Unify the drying by mixing and turning the material with mixing device installed in several places on stainless net conveyor.

### ■ Specifications

Net conveyor type dryer	Туре	Machine dimension									
		Net width	Frame width	Full width	Length (With supplying device)	Height		Supplying device	Net drying part		Processing capacity
								Levelling device	Net	Mixing device	, ,
		mm	mm	mm	mm	mm	kg	kW	kW	kW	kg/h
	NCD-300	1,550	1,760	3,160	9,290	2,335	1,500	0.04	0.2	0.04 x10	300

LPG Direct fire type hot air generator	Туре	Number of machines needed	Machine dimension			Weight	Fan power	Maximum	Gas gun type burner specifications	
			Width	Length	Height	weight	ran power	air rate	Tuna	Maximum gas consumption
		Number	mm	mm	mm	kg	kW	m³/min	Type	kg/h
	HAG-150N	3	650	1,390	810	150	1.5	150	FK10 x2	16.8
