

生葉回転篩機・トラフ型切れ葉取り機

Fresh leaf rotating sieve machine · vibrating sieve machine

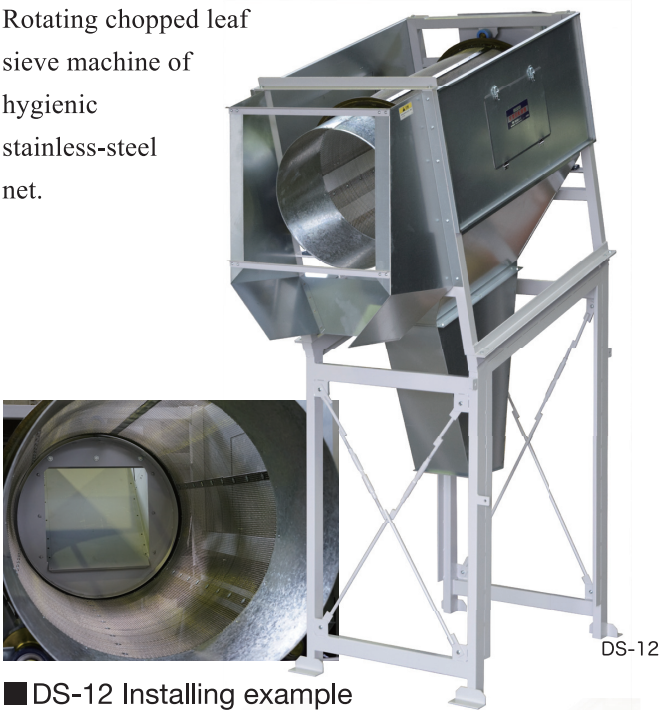

Clean & high-quality tea can be made by removing leaf scraps & foreign materials.

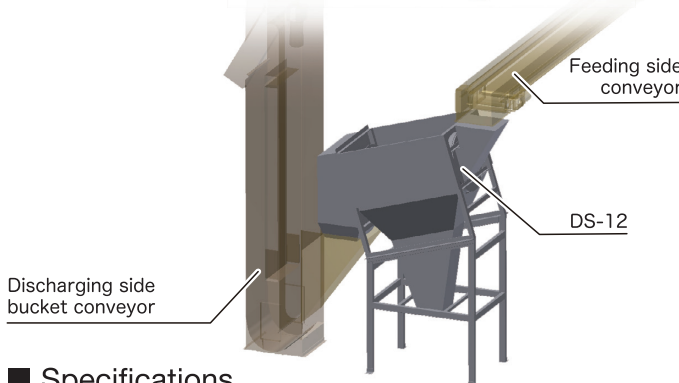

- Leaf scrapes, small stones, dust, insects mixed to fresh leaves can be removed before the steaming process.
- According to removing the foreign material and leaf scrapes, steamed leaves will be clean. (Small cut of leaf cause fermentation & smells with changing the color.)
- Reduces the net clogging of steamer and smooth steaming is possible which improves color & fragrance.
- Steamer cleaning effort will be reduced according to the reduction of clogging of steamer.

Fresh leaf rotating sieve machine

Rotating chopped leaf sieve machine of hygienic stainless-steel net.

■ DS-12 Installing example
