

Clean TW・TY plate

Tea scattering/Primary tea rolling dryer drum bottom resin plate

TERADA

GAP compliant item

GAP : Good Agricultural Practice

Clean TW plate

(For Tea scattering dryer/Wide primary tea rolling dryer)

Clean TY plate

(Final primary tea rolling dryer/Fixed body type secondary tea rolling dryer)

Features

- Tea won't stuck easily & easy for removing stuck tea after manufacturing.
- Machine operational efficiency improves with shorter cleaning time.
- Yielding will be better with less sticking of tea, prevents breeding of bacteria and hygienic and improves the productivity.
- Carries the traditional bamboo slat shape which doesn't slip and efficient rubbing is possible.
- Clean TW plate is highly heat-resistant (260°C), non-sticky, low frictional resistance, wear proof, carbon fluoride resin, PTFE (polytetrafluoroethylene) is used and it is hygienic since hygroscopic and water proof.
- Thermal expansion of clean TY plate has controlled with highly heat-resistant hygienic PP(Polypropylene) material.
- Since it is made to the same shape as bamboo slat, can respond to partial repair.
- When using several primary rolling process machines, we recommend clean TW plate for tea scattering dryer and primary tea rolling dryer (Wide type) and clean TY plate for final primary tea rolling dryer and fixed body secondary tea rolling dryer.

Bottom plate individual shape

※Please be careful of the heat-resisting temperature of the product. Heating without material inside, might cause fire or melting of plates.
※Part of the specifications might be changed for improvement.
