※You can watch videos of this product.

※Image is 3 floor 2 block type.

Hygienic and excellent
breathable polyester net

Features

- Expansion, relocation is very easy and adaptable for various needs.
- Possibility of multi-floor (1~3 floor) installation, has implimented space saving.
- Multi-floor has made the [plowing] possible, which is important for unified withering.*1
- 150kg of green leaf can be processed in 1 block.
- Minimum structure is 1 floor 2 block (300kg) type, maximum is 3 floor 10 block (4500kg) type.
- Healthy polyester net is used, can be removed from the machine and washable.
- Large sirocco fan is used to blow the wind for a block, gained spare wind as static pressure.*2

*1 By adding an untying machine (option) to the changing port, [plowing] capability can be raised.

*2 Various optional heat sources like electric heater can be selected for wind blowing.
