

# Fresh leaf sorter

Supports clean green tea manufacturing  
by removing foreign materials with pneumatic separation.

## Features

- Removes heavy things as stones, metals etc. & light things as dust, dried leaves etc. according to pneumatic separation before entering to the steamer.
- Prevents damaging later process machines like fresh leaf cutter by removing stones & metal.
- Mixing chopped leaves cause leaf smell & color change according to withering. Reduces steamer net clogging, improves color & aroma & also the number of cleanings can be reduced
- By removing dust & insects, improves sanitation & quality.
- Pneumatic state can be checked & adjusted with transparent door.

## Specifications

Type	Length	Width	Height	Weight	Power			Belt width	Processing capacity (Tea leaf)
					Elevator	Fan	Rotary bulb		
					mm	mm	mm		
NIS-1	2,655 ※1	1,422 ※1	2,450 ※1	860 ※1	0.4	2.2	0.01	1,110	400

※1. Except cyclone dust collector

※Part of the specifications might be changed for improvement.
