Fresh tea leaves weighing and accounting system

Kaikei-san

TERADA

Terada tea factory management system "Kaikei-san" upgraded as to support Windows 10.

Features

■ Operation is easy.

Structured with enlarged display, easy to see & understand. It is easy to find features required for operation since separated to groups as using daily & using after tea season.

■ Saves all the input history

● Can answer quickly since deleting/modifying manufacturer or tea farm, fertilizer master won't affect shipped tea history.
● Can be returned easily if modified/deleted by mistake.

■ As other function

● Corresponding wide display, data can be displayed in every corner.
● Same function as excels all fill, sort, filter etc. can be used.
● Print or PDF output is possible also in input display.
● Tax rates input is possible.

■ "Kaikei-san" is structured of 5 systems

1. Weighing & settlement system

Processes from leaves receiving to settling payment. Makes everyday using receive process smoothly with large display & ease of input. State can be checked at glance with data collecting as plucking, tea farm data & management as 4 type pricing. Since the standard display is touch panel usage, automated receiving is possible. It is possible to know the leaf receiving state by using smart phone version "Ruiseki-kun". ※1

2. History management system

Creates various documents by managing cultivation history per tea manufactured in factory. By linking with weighing & settlement system, can respond immediately when a dealer or customer requests the cultivation history.
※Requires weighing & settlement system

3. Fresh leaf analyzing system

Manage/collect data of fresh leaf moisture, nitrogen, fiber analyzed with fresh leaf analyzer (LJM-2). Decides grading by transferring analyzed value from LJM-2 to analyzed value grading master. And plucked state evaluation input is manual, with the result of both grading can be decided. Fresh leaf can be examined with evaluation of device analyzing.

4. Tea sales system

Manage/collect selling price, deposit amount data of tea. Various complicated calculation (Commission, promotion charges, transportation fees etc.) is possible.
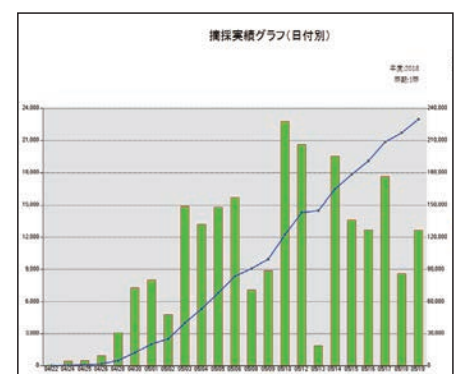

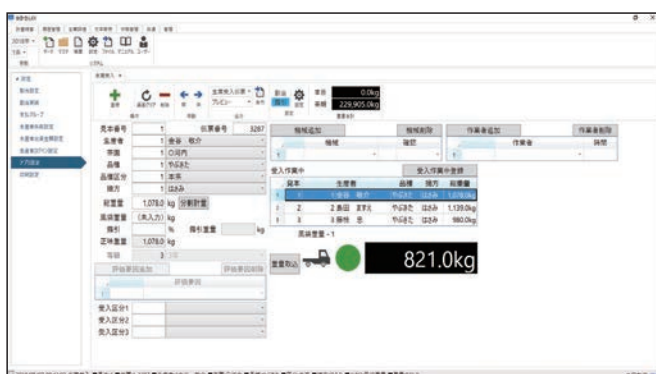

5. Labor management system

Tea factory salary calculation is possible fast & accurately. Can be calculated individual, for each work, hourly etc.

■ Smart phone app "Ruiseki-kun"
※1

"Ruiseki-kun" is a smart phone app to know the leaf receiving state in real time linking with "Kaikei-san". Available both iPhone & android version.

※These are ready to English caption.　　　　　　　　　　　　　※Part of the specifications might be changed for improvement.
