

Vacuum type aerial transportation device

For clean factory without spilling the ingredient

Features

- There is no powder spreading, foreign material mixing since transport the ingredient through the pipe.
- With comparison to machine transportation, malfunction causes are less & maintenance is easy.
- There won't be ingredient stuck through the pipe since vacuum type & transports with clean air since does not suck dust of the ground.
- Installation is easy, transporting route can be set freely. Layout change is also easy.
- It is easy to secure working area, safe & efficient working is possible.

Specifications

Type	Length	Width	Height	Weight	Using fan power	Rotary valve	Capacity
	mm	mm	mm	kg	kW	kW	kg/h
PS-2200	780	526	1,890	71	2.2	0.2	500 (Dry tea)

※Fan & motor part are not included to dimension.

※Part of the specifications might be changed for improvement.
